

Prevent Snow Slide Risks on Standing Seam Roofs

THE CHALLENGE

Standing Seam roofs are built for long-term reliability—offering exceptional durability, extreme weather resistance, and sleek design. However, their smooth, slick surface create a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS ASG3000G

Purpose-engineered for standing seam roofs, the ASG3000G is a durable barricade system engineered to hold the snow mass in place until it sheds gradually, offering superior protection in high snow load areas.

ASG3000G PIPE-STYLE SNOW GUARD

Seamless Safety

Keep your roof line looking clean. Engineered to sit lower on tall and trapezoidal seams, the ASG3000G retains more snow and blends seamlessly into your roofline.

Warranty Protection

Protect your roof's warranty. Oval-point set screws securely attach to the seam without piercing the metal, ensuring your roof's warranty remains intact.

Buildable Retention

Customize your protection level. Add ice flags to prevent smaller chunks of ice from sliding under the pipes in areas that need additional protection

Secure Strength

Remain worry-free during harsh winters. Our versatile clamp securely attaches to a wide range of metal standing seam profiles, including larger single lock, bulb and tee seam profiles, to deliver reliable, heavy-duty snow retention.
