

Prevent Snow Slide Risks on Standing Seam Roofs

THE CHALLENGE

Standing Seam roofs are built for long-term reliability—offering exceptional durability, extreme weather resistance, and sleek design. However, their smooth, slick surface create a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS ASG4025-MINI

Purpose-engineered for standing-seam roofs with lower-pitches (4/12 or less), shorter rafter lengths (10' or less) and snow loads (40 psf or less), the ASG4025-MINI is a durable barricade system engineered to hold the snow mass in place until it sheds gradually

ASG4025-Mini | Aluminum

ASG4025-MINI PIPE-STYLE SNOW GUARD

Seamless Safety

Keep your roof line looking clean. Blend high-performance safety seamlessly into your roof line with the 3/8-inch OD rods.

Warranty Protection

Protect your roof's warranty. Oval-point set screws securely attach to the seam without piercing the metal, ensuring your roof's warranty remains intact.

Superior Strength

Take on whatever winter throws your way. The ASG4025-Mini clamp is forged from a solid block of recycled aluminum for superior strength.

Buildable Retention

Customize your protection level. Add ice flags to prevent smaller chunks of ice from sliding under the pipes in areas that need additional protection

Roof Types	Materials	Finishes
Standing Seam	Aluminum (AL)	Mill Finish, Powder Coating (additional charge) using RAL TIGER Drylac® Exterior Colors
