

ALPINE SNOWGUARDS

Prevent Snow Slide Risks on Premium Natural Slate Roofs

THE CHALLENGE

Natural slate roofs offer unmatched durability and extreme weather resistance, lasting 75 to 100+ years. However, temperature shifts can cause large sheets of snow to suddenly release, creating a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS FUSION-GUARD-18

Purpose-engineered for natural slate, the FUSION-GUARD-18 adds essential surface friction to the roof surface, allowing snow and ice to melt off gradually in small, controlled amounts.

FUSION-GUARD-18 PAD-STYLE SNOW GUARD

Seamless Safety

Keep your roof line looking clean. Blend high-performance safety seamlessly into your roof line with our low-profile design.

Built-in Adaptability

Enjoy ultimate flexibility on-site. Easily upgrade into a solid pipe-style barrier system down the road, with no complex re-engineering required.

Secure Protection

Protect your roof's integrity. The extended 18-inch strap anchors directly into the roof deck above the shingle, preserving structural strength and visual appeal.

Timeless Aesthetic

Your snow retention should last as long as the roof itself. Our mill finish styles are designed to match the lifespan and beauty of natural slate roofs.

Fusion-Guard-18" | Cold Rolled Steel

Roof Types	Materials	Finishes
Natural Slate and Shake, Asphalt Shingle, Synthetic Slate and Shake, Tile	Galvanized Cold Rolled Steel, Copper	Pre-Powder Coated Dark Bronze, Pre-Powder Coated Graphite Grey, Mill Finish
