

Prevent Snow Slide Risks on Premium Natural Slate Roofs

THE CHALLENGE

Natural slate roofs offer unmatched durability and extreme weather resistance, lasting 75 to 100+ years. However, temperature shifts can cause large sheets of snow to suddenly release, creating a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS PD10

Purpose-engineered for natural slate, the PD10 adds essential surface friction to the roof surface, allowing snow and ice to melt off gradually in small, controlled amounts.

PD10 PAD-STYLE SNOW GUARD

Timeless Aesthetic

Keep your roof timeless. Blend high-performance safety seamlessly into your roof with our premium materials and Fleur-de-lis embellishment for copper.

Secure Protection

Protect your roof's integrity. The 15 5/8-inch strap anchors directly into the roof deck above the shingle, preserving structural strength and visual appeal.

Investment Safety

Protect your investment. The PD10 prevents damage to your roof, structure, and surrounding property by safely controlling the release of snow and ice.

Lifelong Durability

Your snow retention should be as durable as your roof. Our design delivers optimal strength in material options that withstand intense environmental exposure.

PD10-CU | Copper

Roof Types	Materials	Finishes
Natural Slate & Shake, Asphalt Shingle, Synthetic Slate & Shake, Tile	Aluminum (AL), Copper (CU), FreedomGray™ (FG), Lead Coated Copper (LC), Rheinzink-prePATINA® Graphite Grey (ZN)	Mill Finish, Pre-Painted Kynar Color
