

Retrofit to Prevent Snow Slide Risks on Natural Slate Roofs

THE CHALLENGE

Natural slate roofs offer unmatched durability and extreme weather resistance, lasting 75 to 100+ years. However, temperature shifts can cause large sheets of snow to suddenly release, creating a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS PD10R

Purpose-engineered for pre-existing natural slate roofs, the PD10R adds essential surface friction to the roof surface, allowing snow and ice to melt off gradually in small, controlled amounts.

PD10R PAD-STYLE SNOW GUARD

↔ Timeless Aesthetic

Keep your roof timeless. Blend high-performance safety seamlessly into your roof with our premium materials and Fleur-de-lis embellishment for copper.

🔗 Lifelong Durability

Your snow retention should be as durable as your roof. Our design delivers optimal strength in material options that withstand intense environmental exposure.

🛡️ Retrofit Ready

Easily add protection to your roof. The PD10R is designed to slide under an existing shingle, and securely seat and hook onto the top edge of the slate when pulled into place.

💰 Budget Friendly

Protection shouldn't cost a fortune. The PD10R offers premium-tier roof protection at a price that fits your budget.

PD10R | Copper

Roof Types	Materials	Finishes
Natural Slate and Shake, Synthetic Slate and Shake, Tile	Aluminum (AL), Copper (CU), FreedomGray™ (FG), Lead Coated Copper (LC), Rheinzink-prePATINA® Graphite Grey (ZN)	Mill Finish (CU or AL), Kynar Color Chart
