

Prevent Snow Slide Risks on Existing Synthetic Roofing

THE CHALLENGE

Synthetic roofing is built for extreme performance—offering exceptional longevity, high wind and hail ratings, and eco-friendly durability. However, its smooth, slick finish creates a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS PD30R

Purpose-engineered for existing synthetic roof systems with short shingle exposure (<6"), the PD30R adds essential surface friction to the roof, allowing snow and ice to melt off gradually in small, controlled amounts.

PD30R | Charcoal Gray Aluminum

PD30R PAD-STYLE SNOW GUARD

Timeless Aesthetic

Keep your roof timeless. Blend high-performance safety seamlessly into your roof with our premium materials and Fleur-de-lis embellishment for copper.

Lifelong Durability

Your snow retention should be as durable as your roof. Our design delivers optimal strength in material options that withstand intense environmental exposure.

Watertight Security

Protect your roof from leaks. Our custom flashing provides a 100% waterproof shield engineered specifically for retrofit applications.

Budget Friendly

Protection shouldn't cost a fortune. The PD30R offers premium-tier roof protection at a price that fits your budget.
