

Prevent Snow Slide Risks on Existing Asphalt Shingle Roofs

THE CHALLENGE

Asphalt shingle roofs are budget friendly, versatile and energy efficient. However, temperature shifts can cause large sheets of snow to suddenly release, creating a critical liability: sudden, dangerous snow slides.

THE SOLUTION: PD40R PAD-STYLE SNOW GUARD

Purpose-Engineered for existing Asphalt Shingle roofs, the PD40R adds essential surface friction to the roof surface, allowing snow and ice to melt off gradually in small, controlled amounts.

PD40R PAD-STYLE SNOW GUARD

Timeless Aesthetic

Keep your roof timeless. Blend high-performance safety seamlessly into your roof with our premium materials and Fleur-de-lis embellishment for copper.

Lifelong Durability

Your snow retention should be as durable as your roof. Our design delivers optimal strength in material options that withstand intense environmental exposure.

Watertight Security

Protect your roof from leaks. Our protective sleeve provides a 100% waterproof shield engineered specifically for retrofit applications

Budget Friendly

Protection shouldn't cost a fortune. The PD40R offers premium-tier roof protection at a price that fits your budget, with aluminum Kynar® colors available to match your shingles at no additional cost.

PD40R | Matte Black
