

THE CHALLENGE

Membrane roofing is built to be durable, cost-effective and energy efficient. However, it's smooth, slick finish creates a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS PP115

Purpose-engineered for membrane roofs, the PP115 is a durable barricade system engineered to hold the snow mass in place until it sheds gradually, offering superior protection in high snow load areas.

PP115 PIPE-STYLE SNOW GUARD

Proven Reliability

Invest in worry-free protection. With over 1.5 million feet installed without a single reported leak, the PP115, when properly installed, gives you decades of proven reliability.

Durable Safety

Enjoy long-term safety. Crafted from extruded aluminum with a stainless steel base plate, the PP115 is rugged enough to withstand intense winter pressure for decades.

Flexible Protection

Get the specific protection level you need. Available in 2-pipe, 3-pipe, or 2-Hi-Pipe configurations and compatible with ice flags to match the snow load requirements of your region.

Watertight Security

Protect your roof from leaks. Designed to be used with a target patch made of the same roofing material, this allows for better seal and ensuring a watertight barrier.
