

ALPINE
SNOWGUARDS

Prevent Snow Slide Risks on Composition Asphalt Shingle Roofs

THE CHALLENGE

Asphalt shingle roofs are budget friendly, versatile and energy efficient. However, temperature shifts can cause large sheets of snow to suddenly release, creating a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS PP120

Purpose-engineered for asphalt shingle roofs, the PP120 is a durable barricade system engineered to hold the snow mass in place until it sheds gradually, offering superior protection in high snow load areas.

PP120 PIPE-STYLE SNOW GUARD

Watertight Security

Protect your roof from leaks. The 8"x 12" embossed aluminum flashing provides a secure, watertight installation.

Durable Safety

Enjoy long-term safety. Crafted from extruded aluminum with a stainless steel base plate, the PP120 is rugged enough to withstand intense winter pressure for decades.

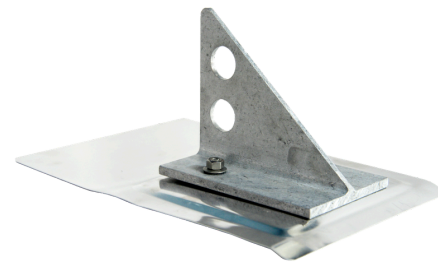

Flexible Protection

Get the specific protection level you need. Available in 2-pipe, 3-pipe, or 2-Hi-Pipe configurations and compatible with ice flags to match the snow load requirements of your region.

Buildable Retention

Customize your protection level. Add ice flags to prevent smaller chunks of ice from sliding under the pipes in areas that need additional protection.
