

ALPINE SNOWGUARDS

Prevent Snow Slide Risks on Hard Shingle Roofs

THE CHALLENGE

Premium hard shingle roofs offer exceptional durability, striking aesthetics, and long-term weather resistance. However, temperature shifts can cause large sheets of snow to suddenly release from these rigid surfaces, creating a critical liability: sudden, dangerous snow slides.

THE SOLUTION: ALPINE SNOWGUARDS PP325

Engineered for maximum performance on hard-surface roofs—including slate, tile, synthetic, and thick composition shingles—the PP325 acts as a heavy-duty barricade. This system holds accumulated snow masses firmly in place, allowing for a controlled, gradual release that eliminates the risk of dangerous sudden slides.

PP325 PIPE-STYLE SNOW GUARD

Seamless Safety

Keep your roof line looking clean. Blend high-performance safety seamlessly into your roof line with our premium materials and in-house powder coating.

Flexible Protection

Get the specific protection level you need. Available in 2-pipe, 3-pipe, or 2- Hi-Pipe configurations and compatible with ice flags to match the snow load requirements of your region.

Watertight Security

Protect your roofs integrity. The custom baseplate anchors directly into the roof deck completely replacing a shingle, preserving structural strength and a watertight barrier.

Buildable Retention

Customize your protection level. Add ice flags to prevent smaller chunks of ice from sliding under the pipes in areas that need additional protection.

PP325 | Aluminum with Stainless Steel Base Plate

Roof Types	Materials	Finishes
Natural Slate and Shake, Synthetic Slate and Shake, Tile, Asphalt Shingles	Aluminum w/Stainless Steel Base Plate & Aluminum Accessories (AL) (SS), Brass w/Stainless Steel Base Plate & Brass Accessories (BR) (SS), Brass w/Brass Base Plate & Brass Accessories (BR)	Mill Finish, Powder Coating (additional charge) using RAL TIGER Drylac® Exterior Colors
