

# Prevent Snow Slide Risks on Standing Seam Roofs

## THE CHALLENGE

Standing Seam roofs are built for long-term reliability—offering exceptional durability, extreme weather resistance, and sleek design. However, their smooth, slick surface create a critical liability: sudden, dangerous snow slides.

## THE SOLUTION: ALPINE SNOWGUARDS SNOWMAX

Engineered specifically for standing seam roofs, the SNOWMAX-STANDING SEAM acts as a continuous barricade to prevent large pieces of snow and ice from falling off a roof.

## SNOWMAX-STANDING SEAM FENCE-STYLE SNOW GUARD

### Seamless Safety

Keep your roof line looking clean. Blend high-performance safety seamlessly into your roof line with the addition of a color insert strip or 2" strip of the roofing material for an exact match

### Warranty Protection

Protect your roof's warranty. Oval-point set screws securely attach to the seam without piercing the metal, ensuring your roof's warranty remains intact.

### Buildable Retention

Customize your protection level. Add ice flags to prevent smaller chunks of ice from sliding under the pipes in areas that need additional protection.

### Superior strength

Take on whatever winter throws your way. Crafted from aircraft grade aluminum the SnowMax is the strongest snow management system on the market allowing up to 48 inch bracket spacing.
